

## MediaMaster Pro 5.0 with MediaHub

Featuring up to 36 layers, this Professional Media Server Software (Mac - PC compatible) turns any powerful computer into a full-fledged professional media server capable of running video shows in sync on multiple servers.

### LED Mapper & Kling-Net Mapper

- **Customizable:** The LED Mapper and Kling-Net mapper extension can import your own mapping of LED devices into MediaMaster, to control everything from a single MediaMaster server.

### Video Mapper

- The Video Mapper is an extension for MediaMaster Pro to do easy mapping of video onto irregularly shaped surfaces and through multiple outputs.

### Main Features

- Up to 36 Layers to prepare, play and output more visuals and effects
- With MediaHub swiftly share your content between servers or computers over networks and remotely monitor the status of any additional machine running MediaMaster
- Easily synchronise text with the new Lyric Player especially designed for singers, church performances and corporate presentations
- Updated LEDMapper supporting larger network thanks to unicast
- Enhanced DMX patching over multiple universes and auto-patching feature
- Precisely align the real-time video content over non-planar or curved screens
- Setup mapping projects quickly with just a few clicks on multiple outputs
- Interactively place LED devices on the screen and view results in real-time over Art-Net and Kling-Net
- Play and mix audio tracks from movie files and turn any controller into a professional A/V mixer

**Never Re-encode Your Media With MediaMaster Pro**
